The Project:

The Results:

Our Philosophy

Quality, Integrity and Commitment (QIC) is the triad that forms the core of our business philosophy. QIC is a sound business ethic that we firmly believe in and carry with us to all our engagements.

Customized Software Development

Project: Cashflow Monitoring System

Client: *IntraVidyut Ltd., Bangalore*

Intra Vidyut Limited is a leading transformer manufacturing company with manufacturing setup at Bangalore and Mumbai. They are involved in manufacture of special transformers for various industrial applications and also into small transformers for power supplies. IVL is an ISO 9001 company.

The scope of the project was to develop a customized software package to monitor the cash flow at IVL. The project goal was to bring in drastic reduction in the non value added activities like payment and material follow-up by automating and also to give comprehensive MIS reporting on cash flow at IVL.

The project development environment was Visual Basic, Microsoft Access, on a Windows NT 4.0 platform.

Our scope included system study, design, development, testing, and user training. With close interaction with the users, their requirements were translated into final designs. The software package was developed keeping in mind quality standards and tight schedules. We accomplished all goals of the project and delivered a quality product.

The software package was developed in a record time of 2 weeks and implemented at IVL. Customer has been using this package to its fullest potential and is very happy.

"WiseSoft Consulting India needs applause for excellent efforts in developing a software package for cash flow monitoring. This package drastically reduces manual interaction and eliminates non-value added activities. I am confident we will benefit by using this package."

Mr. R. D'Cruz - Managing Director
