The Project:

The Results:

Our Philosophy

Quality, Integrity and Commitment (QIC) is the triad that forms the core of our business philosophy. QIC is a sound business ethic that we firmly believe in and carry with us to all our engagements.

Customized Software Development

Project: Online Integrated Software System
Enterprise Resource Planning
Client: *A Leader in Pavings and Tiles Manufacturing*

Our client is a pavement tiles manufacturing company with more than 150 dealers all over the country. They are an ISO 9001 certified company and a market leader in the pavement tiles sector.

We were tasked to study, develop and implement an online integrated system for production planning, materials management, finance, marketing, quality control, payroll, maintenance and factory administration functions. The project goal is to integrate the various modules with the finance module and also enable direct online data transfer between the office and manufacturing facilities.

During the course of this project, WiseSoft has developed in collaboration with our client an ERP system for small-scale industries. This is our first step in providing an integrated solution in ERP/MRP to the manufacturing sector.

The project development environment includes Visual Basic, SQL Server 7.0 and Windows NT 4.0.

We are involved in all phases of the project. We started the project with an initial study and have taken it through the complete software development cycle starting from project planning and management, design, database management, integrated testing, training, development, and consulting. We have provided the necessary impetus to ensure good standards and keep the project on track.

The integrated application software package is presently under final implementation. Customer is very happy that all his business requirements are covered.

"WiseSoft Consulting India has done an excellent job in achieving project expectations and deliverables. They have competent engineers and the software delivered is ISO-9001 compliant. This project has enabled us to achieve, faster and better decision making, manufacturing efficiencies and quality control through the use of the comprehensive system that WiseSoft has created for us."

Rakesh Bhalla, Managing Director.

At WiseSoft® we focus on making "Your Need, Our Concern"™
