The Project:

Our Philosophy

Quality, Integrity and Commitment (QIC) is the triad that forms the core of our business philosophy. *QIC* is a sound business ethic that we firmly believe in and carry with us to all our engagements.

Web-Native / ASP Capability Calendar Application

Client: Web based Clients (Worldwide)

Project: All projects involve Systems Integration Services in addition to Selection & Coordination of Applications/Solutions to be hosted/deployed and integrated into our clients' environment to meet their IT needs.

WiseSoft brings to its' client strong Systems Integration Services. This, combined with its' capabilities delivering integrated solutions for Packaged solutions and also integration with third party Software and Systems into a homogeneous solution make WiseSoft a strategic one source partner for many of its' clients project needs. WiseSoft interfaces as a one point contact for its' clients.

We will discuss Calendar/Calendaring Application(s) here. This model may be extended to any ASP based application easily or other application(s) that fit our clients needs.

Calendar/Calendaring Technology and Applications
WiseSoft is excited to offer its clients' web-native (ASP) Calendar Application solution(s). We also partner with companies in this space and bring to our clients the best of breed solution that benefits and meets their project needs. The products and partners we bring possess all the superior features of a commercial application. Based on the clients' solution needs and budget, we can provide some or all of the following: the flexibility of a development tool, the ability to install our calendaring solutions on a variety of platforms UNIX, Windows, or Macintosh server, and manage time and resources remotely, with no additional client software.

Calendar Application Uses:
1. Group Calendaring and Scheduling - reduces the hassle of scheduling meetings and managing project deadlines. Users can schedule meetings from anywhere on the Web.
2. Event Publishing - Install on the Internet/Intranet site and share event information about the organization, sports schedules, musical performances, or school lunch menus with the public.
3. Resource Management - Manage room and equipment reservations - Assign a calendar to each resource (conference room, laptop, vehicle, …) and eliminate inefficient pen-and-paper sign-up sheets.

Full Access to Source Code - You're in charge when this option is available/applicable. With the source code clearly defined, it's the ultimate flexible tool. You'll be able to modify the program to do exactly what you need. The code is rigorously commented-out and organized by module for easy navigation.

Other Features Listed
