## Custom Software Development

*Project: Healthcare Billing System*

*Client: Healthcare Software Development Company*

A leading provider of software for management information systems for the emergency medical marketplace, for the last 20+ years. Their services include electronic billing for insurance processing, statistical analysis and other billing functions.

### The Project:

The scope of the project is to migrate and enhance their current character based billing application to a GUI interface. The project goal is also to design a schema and application that will support flexibility and ease of enhancement and maintenance in the future.

The project development environment is Delphi 4.0 with SQL Server 6.5/7.0 on Windows NT.

Our engagement includes project management, design, database management, and development consulting. We have been involved in all stages of the development life cycle, except for the very initial project definition stage. This was completed prior to our engagement. We have provided the necessary impetus to ensure good standards and keep the project on track.

### The Results:

The first phase of the project is scheduled to complete in September. WiseSoft is currently on schedule and within budget.

*“Wisesoft, Inc. has done an excellent job in providing the proper personnel needed for the project. Their knowledge base, experience, communication, and interpersonal skills have matched our requirements and they have integrated into our staff very well. I would recommend WiseSoft, Inc. to anyone needing consulting, design work and programming.” - CEO*

#### Our Philosophy

Quality, Integrity and Commitment (QIC) is the triad that forms the core of our business philosophy. QIC is a sound business ethic that we firmly believe in and carry with us to all our engagements.

**At WiseSoft<sup>®</sup>, Inc. we focus on making “Your Need, Our Concern.”<sup>™</sup>**
