Web Application Migration

Product: Microsoft SQL Server 6.5/7.0
Financial Services Company

A leading financial services company that serves the clients on financial and investment strategy for individual and corporate clients.

The Project:

The database available on Microsoft Access was to be upsized and implemented using Microsoft SQL Server 6.5/7.0 to accommodate increased amount of data and amplifying the performance. Our consultant team had the responsibility of upsizing of the data and reengineering of the web based application to use stored procedures. The web based application implemented on Visual Basic 6.0 and used ODBC for the connection to the database. The reports were made using Active Reports tool. The reports generated were in PDF format and were able to be viewed over the web. Advisor link application helps the Financial Services company to advise its individual and corporate clients on the investment options and generates various reports for the same purpose.

The client had a strict quality control system. The Method/1 documentation and quality standards were used to evaluate the work performed by all personnel in the project. Our consultants were able to adhere to the strict quality standards and provide optimum performance needed to complete the project.

The Results:

Adherence to strict quality standards and implementation of the high technology web based solution to evolve more comprehensive and effective solution on investment and to expand the customer base was achieved with the tool.

Our Philosophy

Quality, Integrity and Commitment (QIC) is the triad that forms the core of our business philosophy. QIC is a sound business ethic that we firmly believe in and carry with us to all our engagements.

At WiseSoft[®], Inc. we focus on making “Your Need, Our Concern.”[™]
